

19

$$\text{Average (4 test)} = 70$$

$$\begin{aligned}\text{Total marks} &= 70 \times 4 \\ &= \underline{\underline{280}}\end{aligned}$$

$$\text{Average (5 tests)} = 75$$

$$\begin{aligned}\text{Total marks} &= 75 \times 5 \\ &= 375\end{aligned}$$

$$\begin{aligned}\text{Fifth}^{\text{test}} \text{ mark} &= 375 - 280 \\ &= \underline{\underline{95}}\end{aligned}$$

She must score 95 marks in her fifth test.
