Ch-4 Lesson-4 How do people disturb balance?

12/3/2020
Q1:What are the reasons for air pollution?

Ans:The harmful gases released by factories and vehicles into the air cause air pollution.

Q2:How does water become polluted?

Ans: Water becomes polluted when wastes and chemicals get into the rivers, lakes and oceans. Some chemicals are used on land to grow plants and kill insects, these chemicals are washed away by rain water and enter into water. Sometimes spills and leaks occur during the drilling and shipping of oil can also pollute the water.

Q3.What are hazardous wastes?

Ans: Hazardous wastes are the chemicals that are very harmful to humans and other organisms. These substances may be poisonous, cause diseases, start fire or react dangerously with other substances.

Q3.What human activities damage the environment?

Ans: Cutting down forests, building dams and roads, mining etc are some human activities that damage the environment.

Q4.What are somethings people have done to protect the environment?

Ans: Laws require companies to reclaim the land after mining it ,and proper dispose of waste materials and to replace resources such as trees and other plants.
