Answer the following questions:

1) Why does the Sun look small?

Ans:

2) What causes day and night?

Ans :

Fill in the blanks:

Moon	night	planet
------	-------	--------

1) Earth is called a _____.

2) The _____ moves around Earth.

3) When Earth does not face the Sun, it is _____.

Read the questions and underline the correct answers:

1. How many rotation does Earth make every day?

- a) Three b) One c) None d) Two

2. Which of these gives off light?

- a) The Earth b) A planet c) A star d) The Moon

3. What causes day and night?

- a) Shadow b) The Moon moving around the Earth.
c) Dark clouds moving across the sky. d) The rotation of the Earth.

Circle the words in the puzzle:

STAR, TELESCOPE, ROTATION, MOON, SUN, PLANET
