

**BANGLADESH INTERNATIONAL SCHOOL. ENGLISH SECTION. RIYADH.**

NAME: \_\_\_\_\_ SUBJECT: **BANGLADESH AND GLOBAL STUDIES**

GRADE: **5** CHAPTER: **6 . CLIMATE AND DISASTER**

SECTION: \_\_\_\_\_ NO OF WORKSHEET \_\_\_\_\_ SEMESTER: \_\_\_\_\_

WORKSHEET DONE BY: **MRS. KISHWAR SULTANA**. SIGNATURE OF HOD.  25/04/2020

**(Q1) Match the words in the left column with the words in the right column.**

- |   |   |
|---|---|
| (a) Bangladesh's natural location and climate | mostly due to man-made pollution (b)    |
| (b) Climate is changing throughout the World  | put it at risk of natural disasters (a) |
| (c) By 2050 20% of Bangladesh's land area     | many rivers (d)                         |
| (d) Bangladesh is a country with              | is flood (e)                            |
| (e) The main natural cause of erosion         | might be flooded by seawater (c)        |

**(Q2) Write "true" or "false" on the left side of the following statements.**

- (a)  T Weather is average temperature, rainfall and air pressure during a short period.
- (b)  T Climate is average weather over a long period of time.
- (c)  F If the river banks burst, valuable farming land is formed.
- (d)  T The extra volume of water in the rivers puts pressure on the banks.
- (e)  F Our country rarely has floods.

**(Q3) Tick( ) the correct answers:**

**(a)Which is responsible for air pollution by increasing of factories and vehicles?**

(1)Nature **(2)Human** (3)Government (4)Environment

**(b)Which can be known from the average temperature of 30 years by weather specialist?**

(1)Weather **(2)Climate** (3)Natural disaster (4)Earthquake

**(c)What kind of disaster is flood?**

**(1)Natural** (2)Regional (3)Geographical (4)Manmade

**(d)What can happen due to deforestation?**

(1)River erosion **(2)Drought** (3)Flood (4)Cyclone

**(e)What can happen if you cut trees and do not plant them?**

**(1)Drought** (2)Earthquake (3)Rainfall (4)Cyclone

**(f)How many areas of Bangladesh will be submerged within 2050?**

(1)10% **(2)20%** (3)30% (4)40%

**(g)How many years average weather is called climate?**

(1)20-30 (2)25-30 **(3)30-40** (4)10-20

**(h)Why are our lands submerged?**

(1)Cyclone **(2)River erosion** (3)Drought (4)Earthquake

**(Q4) Fill in the blanks:**

- 1.Global warming causes ice to melt and **rivers** to dry up.
- 2.Climate change causes frequent severe **floods**.
- 3.**Unplanned** river excavation is a man-made threat to river-banks.
4. Air pollution from **factories** also makes the atmosphere drier.
- 5.Drought makes it harder to cultivate **crops** in the fields.
6. A major earthquake can have secondary effects like **Tsunami**.

**(Q5) Question/Answer:**

- 1.Write any four effects of climate change in Bangladesh?

Ans: a.Increased average temperature.

b. Heavy rainfall or less rainfall.

c. More tornadoes.

d.Trees and animals are destroyed.

- 2.Write the names of two natural and man-made causes of river erosion.

Ans: Natural causes:

a. Flood

b. Low and high tide

Man-made causes

a. Picking up sand from river

b. Cutting down trees near river banks

- 3.Mention two things that cause drought.

Ans: a.Cuting down trees.

b.Too much building covers the ground with concrete so that it does not absorb water.

4. What are the effects of drought?

Ans: a. Rivers, wells, lakes and canals dry up.  
b. Fodder for cattle becomes scarce.

5. What should we do during an earthquake?

Ans: a. Stay completely calm.  
b. If you are in bed, cover your head with a pillow.  
c. Shelter under a wooden table or other strong furniture.
